

DBP-4010UDCI

Universal Audio/Video Player

DENON

Reference Universal disc player, handles the widest variety of disc formats with the ultimate in picture and sound quality

The DBP-4010UDCI lets you enjoy not only Blu-ray discs and DVDs but also a wide variety of other discs in your library, such as Super Audio CDs, DVD-Audio discs and CDs, as well as recordable Blu-ray and DVD discs. This level of quality is made possible with Denon's vibration-resistant technologies such as Direct Mechanical Construction and Multi-layer Chassis Structure, and superior audio and video circuit performance is the result of Denon's newly-developed S.V.H. mechanism that reads signals from the disc with impeccable precision. The audio circuitry features Advanced AL24 processors for all channels to achieve superior sound quality, while the video circuitry incorporates Anchor Bay's Advanced VRS ABT-2010 video processor for the ultimate HD image quality. The DBP-4010UDCI is also equipped with DENON LINK 4th to thoroughly minimize jitter during HDMI transmission, for the best possible audio quality when paired with a compatible Denon A/V receiver (*1).
