

Transparent Elegance

An air of elegance surrounds the D-G1 mini Hi-Fi system and quietly pervades the room. A new concept in personal Hi-Fi design has come into the world, bringing delight to music lovers everywhere. Even though the D-G1 contains all the functions of the receiver, the CD player, and the cassette deck within a single unit, it is only 180 mm wide, 259 mm high, and 287 mm deep. You can set up the D-G1 just about anywhere you like. There is a remarkable sense of transparency about the D-G1 that lets it blend in well with virtually any interior, and it is small enough to fit onto a bookshelf, bay windowsill, or other inconspicuous spot.

Another remarkable aspect of the D-G1 is the rich sound that fills your room from such a modest-looking unit. Then there is the D-G1's remarkable ease of use. The D-G1 just gives you the functions you really need. With beautiful sound, elegant design, and simple operation, the D-G1 is the perfect companion for a lifestyle that persistently beckons you to enjoy a few moments of peace.

■ DENON's Famous High-Quality Sound

Despite the D-G1's unassuming appearance, it boasts high output power of 20 W + 20 W, capable of reproducing all genres of music with a rich sound that effortlessly fills your listening space.

■ 4-mode Graphic Equalizer for Custom Sound Refinement

You can choose any of four sound spaces—Rock, Pops, Classical, and Flat—to enjoy the type of music you want to hear.

■ Versatile Timers

The D-G1 provides a REC timer that activates the recording function when the power switch is turned on, and a Sleep timer that turns the unit off every night (or any other time) in 10-minute increments from 10 to 60 minutes after you turn it on.

■ Bass Control, for a Powerful Bass Foundation

The D-G1 includes a Bass Control function that enriches the deep bass sound, further defying the modest size of the speakers. You can enjoy this reinforced bass foundation even at relatively low volume levels.

■ Large, Easy-to-Read Display

The characters on the D-G1's large display are clear and easy to read. The function buttons on the front panel, too, are large and glow in the dark for quick, easy operation at any time.

■ Auto Power Off

In a function mode other than the tuner, if there has been no operation for approximately 30 minutes, the system will automatically turn itself off to reduce power consumption.

■ Convenient CD Editing Functions

Playback functions include Random Play, 20-track Programmed Play.

■ CD-Synchro Recording System

■ Full Logic Auto Reverse Mechanism, for Automatic Playback of the Reverse Side of a Tape

■ Dolby Noise Reduction, for Improved Sound Quality during Recording and Playback

The D-G1 is equipped with a Dolby B noise reduction circuit to reduce tape noise and enhance the realism of the sound over the full spectrum from large to small signals.

Speaker Section

■ **Pearl Mica Woofer Cones, for Superior Response Characteristics**

The D-G1's speakers feature soft dome tweeters and woofers with pearl mica cones that are highly responsive to sound vibrations. The combination of the two produces a clear, lively sound, rich with musical details.
